### Stock Tank Mixing

Mix 1 lb of soluble-powder per gallon of water. Never mix multiple products together in concentrated form. Use reverse osmosis (RO) or distilled water for all stock tank concentrate mixes.

### Application Instruction

Follow mixing directions as given above, adjusting EC levels for the demands of your plants.

Nutrient Solutions: Mix new réservoir weekly. Feeding frequency for Coco: Daily.

Other Substrates: 2-4 times/week as necessary.

Flushing weekly is suggested.

Every purchase of the Cultivator Series is backed by Advanced Nutrients' ironclad **100% Money-Back Grower Guarantee**. Growers will also enjoy **24-hour** support, Monday through Friday, from our expert grower support team.

Contact your sales representative to order the Cultivator Series now.
